Title of the Thesis

Yiming Chen
B.Eng(Hons)

A Thesis submitted in fulfilment of requirements for the degree of
Master of Science
Title of the MSc Programme
of Imperial College London

Department of Electrical and Electronic Engineering
Imperial College London
May 31, 2017

Abstract

The abstract is written here. This should concisely state the main aim of the work and the achievements.

Acknowledgment

Acknowledgments can be written here.

Chapter 1

Introduction

1.1   Background

THIS is an example of the start of a chapter. Other chapters use files which could be titled, for example, ChapTwo.tex and then included in the list of chapters within the file Thesis.tex

To build this document, run latex on MScThesisTemplate.tex, then run bibtex, then run latex again. This has the effect of extracting the information ready to build automatically your list of references. Add references to the file references.bib following the syntax shown in the examples.

Here is an example figure as seen in Fig. 1.1. LaTeX positions figures for you at the 'best' point in the document. Here is an example of a citation [?] and this is another [?] and yet another [?].

Appendix A

Appendix Title

Theorem 1. *It is sometimes desirable to place material in an appendix such as this. If you don't have any such material, then the appendix is of course optional. Many people manage without one.*

Proof. This is the proof. □
